THE BACCARAT SCANDAL.

The trial going on in London over the card scandal at the country house of an having cheated at cards, his future social seems ever to stop to read it. career is irreparably ruined unless be can have the charges declared false.

GORDON-CUMMING has done distinguished service in the army, and belongs to several swell clubs. It is easy to understand what this charge is to him. But what lends special interest to the case is the presence of the Prince of WALES in court as a wit-

The revelations of the trial are no pleasant ones for any of the parties concerned, but they are taken in with infinite relish by a packed gathering of Court scandal-lovers, who esteem the holding of tickets of admission a privilege almost beyond price. To the Prince, least of all, is this publicity concerning affairs at a private gaming table a welcome thing. But be faces the crisis with true British stolidity, and is promptly ready for the witness box.

NEW WORK FOR CONVICTS.

The interesting announcement is made of a new industry for convicts, which has been started at Sing Sing Prison and will, it is said, if successful there, be established it the other prisons of the State. Warden BROWN has expressed some confidence that if the plant prove a success it will solve the long agitated question as to the right and wrong of prison labor.

The branch of work referred to is known as the brush-fibre industry, and consist principally in converting bales of tampled horses' tails, hogs' bristles, &c., into proper condition to be sold to brush manu Incturers. The raw materials are pur chased from wholesalers in New York.

This brush material, the Warden says, nearly all prepared in England and Ger many, and the material is imported princi-'pally in a condition ready for the manufact turers. It is this fact which leads to the Warden's confidence, expressed above, as the industry cannot be claimed as an interference with outside labor. The outcome of the experimental plant will be watched for with interest. About thirty men are at present employed.

TREASURE HUNTERS.

That opulent pirate, Capt. Kipp, would have spared a greedy and imaginative ger eration much useless labor if he had willed all his money to some infant asylum and had been paid over. The search for his treasures breaks out with mournful fre-

The desire to get riches without work too common a one. Most of our rich men are examples that wealth is the fruit of the hardest kind of industry, but their example compared to Captain Kipp' buried gold. The lazybones who seek this good fortune for themselves are, of course, mented by a bristing gray imperial. He is now the last who deserve any such streak of manufacturing gues in England and devotes his attention to an electrial flying machine. luck, and it is a comfort that they do not strike any hidden treasures.

The large bulk of the elephants made them good targets, and the torpedoes snapped well on the tough, smooth hide. But it gave one of the huge creatures hysterics, and he ran among the crowd. Happily the keeper hooked him back before he could do any damage. When the college boys saw this danger they had sense enough to stop, which is worthy of

The Church Militant seems to be entering onto an unusually militant phase. Ministers are coming forth with their view in spite of angry opposition. In a small New York town lately a parson who had been ejected from his pulpit by the trustees made a break for it at the next meeting and insisted on conducting services right in the kasth of his rival. He was arrested for disturbing a religious meeting. St. Paul was pretty combative, but he could hardly approve of rowing in open church.

The wild boy of the East is never entirely extirpated, but there is no reason why every effort should not be made to stamp him out. A little fourteen-year-old tough who was kindled to daring deeds by bad literature and bad beer went out in a boat and ahot at three other boys. He then shot at everybody who tried to arrest him, but was fin-lly bagged. Make it good and og for the youngster. He needs a pow-

The great Western educational institutions are not behind those of the East in their recogition of woman's work. Mrs. Mary Lowe Dickinson, well known for her years of good work in literary, philanthropic and educations: Belos, has held for two years the professorship f English Literature in the University of Denrer. The chair has recently received an enowment of \$50,000 from ex-Gov. Evans, President of the Board of hough Mrs. Dickinson's health forbade her to resume her work this year the chair has been amed the Mary Lowe Dickinson Chair o Belles-Lettres.

Every Taursday evening the Endeavor Club of working girls meet at 59 Morton street and nave a General Discussion. Here are some of he questions discussed recently: "Shall the Metropolitan Museum be opened Sundaya? The Needs of Police Matrons; the Silver Question, and What would you do for New York if you were despot for a year?" Who says the working girls are behind the times?

This is an awfully hard season for the woma of limited means for the reason that a radical change has come over dresses, wraps and bonnets. There is nothing in the wardrobe, purchased in the last seven years, that can b worn on the street with comfort and peace of mind. Take the waist, for lustance, of a good dress made in 1886, and its low collar, tight sleeves, thick waist, broad back, side gords and full skirt, to cover the tournure or extender, is like a reli of the last century. LFrom Brooklyn Life. 1 He (from the fill), calling on the Heights)— You snow I expect my sister home from Enrope to-morrow afternoon and I have got to meet her at the steamer. She--Must you go so seen?

I was standing yesterday near the crowd of people on Fifth avenue who were wanting for the police parade to come along, when suddenly a tall man grabbed a fellow the throat and cried "Officer!" man elutched was very red in the face and exceedingly embarrassed. "You've got my waten," exclaimed the tail man who held nim. In an instant almost a man in plain clothes cropped out from some-'There's your watch!" said the fellow, and ore enough the chain was dangling from the man's waistcoat. "Well, you tried to steal it anyhow," was the answer, and the three walked off together to the station.

THE CLEANER

It seems that the police only got one hour extra rest in which to recruit after the parade. At least a policeman told me last night that they were turned on at 7 instead of 6 o'clock in the evening. They were probably a pretty marching gait for a stout man is pretty tiring.

A pair of those big Normandy horses going under an "L" train yesterday got quite excited and frightened. Generally they are so calm and dignified that it was a novelty to see them starting and tossing their heads. They are huge, good-natured beasts. I see that Mrs. Russell Harrison has arrived

in town and will sail to-morrow on the Ten-tonic. Mrs. McKee, who has the honor of being the mother of that marvellous child, will also go to Europe on the Teutonic. vacation are good reliable signs of Summer. The tall yellow tower of the new Madison Square Garden presents an imposing sight to ne Broadway promenader as it looms up in all its massive proportions above the dense foliage of the trees in the park. The building itself is entirely hidden from view from the west side f the park, but the glimpse of tower is suffitent to suggest its huge structure. Hundreds f strollers on Madison avenue pause to admire the handsome arcade and grow enthusiastic over the architectural beauties of the building. Just at present its front is disfigured by the big painted sign-poards which announce the entertainment that is furnished within-

Architects say that it is a structure of which New York may well be proud. Some of the steamship companies seem to be put to as much ingenuity in inventing names racing stables are to select something original White Star Company calls its new twin-serew treighter the Tauric, which, presumably, has ome connection more or less remote with the fact that the vessel is designed especially for carrying cattle.
